

Dana Anaby (School of Physical and Occupational Therapy at McGill University) and her research team at the [ASPIRE Lab](#) located at the Lethbridge-Layton-Mackay Rehabilitation Centre study the effect of leisure participation and the environment on the well-being of youth with physical disabilities. She is currently looking for a part-time bilingual research assistant with a background in qualitative methods to join her team. The role will include the following:

- Conducting individual French interviews with 2 youth and 2 clinicians remotely
- Analyzing qualitative data of 18 transcribed interviews (14 English, 4 French)
- Drafting report and results

Dana is looking for an individual who meets the following criteria:

- Holds a Master's degree in a field related to health/social work
- Has at least 2 years' experience in collecting and analyzing qualitative data
- Has experience working with youth
- Strong communication and writing skills (especially English)
- Flexible schedule (as required)
- Fluent in English and French

The individual will work up to 70 hours starting this summer at \$30 per hour.

Job start date: Immediately

Please reply only if you meet the above criteria. When applying, please include a cover letter, CV and a contact reference pertaining to your research experience.

You can contact Dana at: dana.anaby@mcgill.ca

We look forward to hearing from you!
